

Rabies Reference Laboratory- Medical Research Institute- Statistics -2014

Post mortem diagnosis of rabies - Animals

Type of test	Number tested	Number positive for rabies
Direct smear	1425	296
FAT	1061	458
ICT	15	01
Mice inoculation	01	00
Molecular- Conventional PCR	04	00
Number of samples decomposed & unfit for examination	69	-
Total number of specimens received	1494	747

Post mortem diagnosis of rabies- Human

Type of test	Number tested	Number positive for rabies
FAT	28	19
Molecular – Conventional PCR	01	00
ICT	03	01
Total	28	19

Number of human samples decomposed & unfit for examination - 02

Ante mortem diagnosis of rabies- Human

Type of test	Number tested	Number positive for rabies
Molecular	-	-
RFFIT	03	01
Total	03	01

Detection of immune response after Anti rabies immunization

Type of test	Number tested	Number above the minimum protective titer of anti-rabies antibodies
RFFIT	46	46
