Preface

The Cochrane Handbook for Systematic Reviews of Interventions (the Handbook) provides guidance to authors for the preparation of Cochrane Intervention reviews (including Cochrane Overviews of reviews). The Handbook is a long-standing document and is updated regularly to reflect advances in systematic review methodology and in response to feedback from users. This book coincides with version 5.0.1 of the online publication of the Handbook.

Keeping up to date

Please refer to the following web site for the most recent version, for interim updates to the guidance and for details of previous versions of the Handbook.
